

# eHealth Services for Child and Adolescent Psychiatry (eCAP)

**Kirsi Bykachev**

University of Eastern Finland, Department of Nursing Science

**Siri Bjørvig**

Norwegian Centre for E-health Research

# Aims

- Improved quality and availability of child and adolescent psychiatry (CAP) services in remote, sparsely populated areas by developing
  - Consultation
  - Supervision
  - Diagnosis
  - Treatment
  - Multi-professional collaboration
  - Knowledge among professionals about mental health and mental health problems

with the help of eHealth

# Target groups

- Professionals working for specialist healthcare
  - Child psychiatry
  - Adolescent psychiatry
- Professionals working for primary healthcare
- Parents / guardians / families
- Adolescents up to 18 years of age
- Children up to 14 years of age

# Expected results of the project

- Electronic booking system for video conferences (VC)
- VC for consultation, supervision and treatment
- Electronic forms for background information (SDQ)
- Development and Well-Being Assessment (DAWBA)

⇒ Improved multi-professional collaboration

⇒ Transfer of knowledge and treatment capability from specialist health care to primary health care

⇒ Increased knowledge among professionals about mental health and mental health problems

⇒ Better care, more equally and timely

⇒ **Improved quality and availability of CAP services in remote, sparsely populated areas**
